

MEDIVATORS® ENDO GATOR®

Hybrid Irrigation Tubing

The premium infection prevention of the ENDO SMARTCAP® and ENDOGATOR® Tubing are combined into one innovative system.

With ENDOGATOR Hybrid Tubing, you can use either room air or CO2 for insufflation. The Hybrid Tubing delivers humidified CO2 which can help prevent the mucosa from drying out during procedures.

- Fits any sterile water bottle
- 24-hour disposable tubing
- Eliminates manual cleaning and reprocessing of reusable water bottle and tubing
- Prevents potential cross-contamination due to elimination of reprocessing steps

For ENDOGATOR Hybrid Tubing with FUJIFILM™ scopes, incorporate a connector on the irrigation line, which helps navigate the anatomy of the FUJIFILM scope.

ENDOGATOR Hybrid Tubing has a soft design that prevents scope port damage.

Tubing is colored for reference only
